Initial Health Evaluations

WHAT THE FIRST DAY WITH US LOOKS LIKE

Evaluation & Listening Session

Upon arrival, our dedicated team will thoroughly evaluate your health challenges and aspirations, accompanied by a comprehensive physical assessment. We'll talk about what matters to you, your health goals, and any concerns you may have. We'll discuss the array of services and offerings available at our clinic, and together, we'll determine what aligns best with your interests.

Following up on our discussion, you can complete or schedule our signature blood marker panel that is actually performed in our office. Once completed, our functional experts will review your blood panel.

Results Review

You'll then be scheduled for a second appointment to review your results and interpretations with our team. During this session, they will provide you with the recommended steps for your tailored health plan while also discussing options for customization to suit your preferences. We'll ensure your plan is uniquely designed to address your needs and effectively align with your health goals.
